ABOUT ME

Full-stack developer with **2.5+ years of experience** building responsive UIs with React.js and developing scalable RESTful APIs using Node.js and Express, following MVC architecture.

EXPERIENCE

2024 - Present
Prosoft E-solutions India

- Software Developer**
- Built a **Node.js + WhatsApp Cloud API** chatbot handling 10K+ messages/month
 - Integrated a secure web admin panel with role-based access control for bot configuration and management using **React.js + Express**.
 - Contributed to the migration of a legacy application **C5 Cat Analyzer** to **C5 Cat Web** in React.js and Node.js, implementing multilingual support and enhancing user experience by **60%**.
 - Increased file import performance by **40%** through parallel processing, optimized uploads with **express-fileupload** package, and state management via **Tanstack React Query**.
 - Utilized **Axios interceptors** for centralized **JWT token** handling, ensuring secure and consistent authentication throughout the application.

2023 - 2024
CodeArray Technologies

- Associate Software Engineer**
- Implemented a role-based authentication system using **React.js and Redux Toolkit**, ensuring secure and personalized user access.
 - Created a custom theme colour selection feature for login screens, enhancing personalization and branding.
 - Enhanced order processing in EZ Order by **70%** using advanced Redux Toolkit techniques.

EDUCATION

2019 - 2023
CGPA - 8.23/10

Rizvi College Of Engineering, Bandra, Mumbai
Bachelor of Engineering In Computer Engineering

SKILLS

- | | | | |
|----------------------|--------------|--------------|------------|
| JavaScript | React.js | Node.js | Express |
| Tanstack React Query | Redux | React Native | PostgreSQL |
| Material UI | Tailwind CSS | Bootstrap | Github/Git |
| Render | Convex | | |

PROJECT

Career Compass Web App

- Working on a full-stack job tracking web application enabling users to manage and organize their job applications from multiple platforms efficiently.
- Implemented secure user authentication and authorization using **JWT** with **Axios interceptors**, ensuring safe access control across user sessions.
- Built the backend using Node.js and Express.js, with PostgreSQL for structured data storage and complex queries.
- Integrated Material UI for a modern and responsive frontend UI, enhancing user experience across devices..
